i.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: 1.

The prior art fails to teach: Regarding Claim 1, a mounting apparatus for mounting a hollow work-piece on a machine, the mounting apparatus comprising: a dampening plug assembly for positioning inside the hollow workpiece adjacent the cylindrical supporting fixture; and an end pressure reducing device for mounting within the circumferential groove underneath the end of the hollow workpiece for centrifugally supporting and enabling the reduction of machining-induced pressure from the end of the hollow workpiece; and Regarding Claim 16, a first foam rubber member for positioning inside the hollow workpiece adjacent said cylindrical supporting fixture, said first foam rubber member having a first density and a first durometer within a first range of durometer values, and a second foam rubber member for mounting within the circumferential groove underneath the end of the hollow workpiece for centrifugally supporting and enabling the reduction of machining-induced pressure from the end of the hollow workpiece, the second foam rubber member having a second density different from the first density, and a second durometer within a second range of durometer values that is greater than said first range in combination with the other elements of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/643,354

Art Unit: 3726

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John C. Hong whose telephone number is 571-272-4529. The examiner can normally be reached on M-F(07:00-16:30)First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 571-272-4690. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
